**Concepts and Cases in Nonunion Treatment (AO Trauma Handbooks)** Ren K. Marti, Peter Kloen

The gold standard for the treatment of nonunions was set by Weber and Cech in the early 1970s. With this new book the Editors Ren K Marti and Peter Kloen provide a comprehensive update on the state-of-the-art treatment of nonunions.

More than 130 case descriptions are included in the unique cases section; the core of this collection represents 40 years of Ren Martis personal experience in nonunion treatment, demonstrating the principle technique over technology. The editors have also carefully selected additional cases, contributed by several experts in nonunion treatment. Each case provides step-by-step descriptions of case history, preoperative planning, surgical approach, reduction, fixation, rehabilitation, and finally pitfalls and pearls. Hundreds of full-color pictures, precise illustrations, and x-rays demonstrate the significant steps in nonunion treatment.

In the principles preceding the case presentations relevant information on evolution, basic science aspects, nonoperative treatment, bone graft, as well as infected nonunions is provided. The guidelines and solutions presented for the management of nonunions support orthopaedic and trauma surgeons worldwide.

*This book will serve as an invaluable aid for any orthopaedic or trauma surgeon who has to deal with the problem of pseudarthrosis.*

Norbert P Haas, President of the AO Foundation
