**The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory)** Ozgur Ergul, Levent Gurel

The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetic Problems provides a detailed and instructional overview of implementing MLFMA. The book:

- Presents a comprehensive treatment of the MLFMA algorithm, including basic linear algebra concepts, recent developments on the parallel computation, and a number of application examples
- Covers solutions of electromagnetic problems involving dielectric objects and perfectly-conducting objects
- Discusses applications including scattering from airborne targets, scattering from red blood cells, radiation from antennas and arrays, metamaterials etc.
- Is written by authors who have more than 25 years experience on the development and implementation of MLFMA

The book will be useful for post-graduate students, researchers, and academics, studying in the areas of computational electromagnetics, numerical analysis, and computer science, and who would like to implement and develop rigorous simulation environments based on MLFMA.

**From reader reviews:**

**Theresa Gordon:**

Have you spare time for the day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their very own spare time to take a wander, shopping, or went to the actual Mall. How about open or read a book called The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory)? Maybe it is being best activity for you. You understand beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with its opinion or you have some other opinion?

**Jenny Davis:**

This book untitled The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory) to be one of several books this best seller in this year, this is because when you read this publication you can get a lot of benefit upon it. You will easily to buy this book in the book retail store or you can order it by using online. The publisher in this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Touch screen phone. So there is no reason to you personally to past this e-book from your list.

**Sandra Passmore:**

This The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory) is great book for you because the content that is certainly full of information for you who always deal with world and have to make decision every minute. This book reveal it facts accurately using great manage word or we can claim no rambling sentences included. So if you are read this hurriedly you can have whole details in it. Doesn't mean it only provides straight forward sentences but tricky core information with lovely delivering sentences. Having The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory) in your hand like getting the world in your arm, information in it is not ridiculous just one. We can say that no book that offer you world in ten or fifteen minute right but this book already do that. So , this is certainly good reading book. Hey Mr. and Mrs. busy do you still doubt that will?

**Charles Brewster:**

In this period globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of references to get information example: internet, paper, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The book that recommended for

you is The Multilevel Fast Multipole Algorithm (MLFMA) for Solving Large-Scale Computational Electromagnetics Problems (IEEE Press Series on Electromagnetic Wave Theory) this publication consist a lot of the information of the condition of this world now. This particular book was represented how does the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The actual writer made some exploration when he makes this book. This is why this book suited all of you.
