What Your Atheist Professor Doesn't Know (But Should) (Volume 1) Stephen Joseph Williams

The information age has begotten turmoil. It seems that the more information we have, the less peace the average person has. To many, an impression has developed that modern science has disproved the existence of the immaterial realm, and doomed us to a sterile, pointless wandering in the wilderness of minutiae. During roughly the same time this impression has been developing in popular culture, however, massive evidence to the contrary has been steadily erupting from The Sciences! Now that literally billions of trillions of layers of mathematical impossibility have been exposed for the Materialist worldview, compounded by insurmountable metaphysical hurdles, atheism has been shown to be completely irrational! A reasonably skeptical look at modern philosophy, science, archaeology and history point overwhelmingly in a single direction, and the truth that it points to is blissful and eternal. If you'd like to see some of the evidence that has been causing a resurgence of Theism in academic philosophy departments recently, read this book!
