Gunsmithing Simplified Harold E. MacFarland

Here is one gunsmithing book that doesn't presume you have all the equipment in the Springfield Armory - or that you hold degrees from MIT in Engineering, Chemistry, Physics, Ballistics, Thermodynamics, and Calculus. As a matter of fact, Harold MacFarland tears the "Top Secret" classification off a lot of gunsmithing mysteries, and reveals many professional secrets that save hours of work, produce better guns, and leave you with money to spare. He has devised many short cuts and new methods himself, and in the true rifleman spirit he tells you how to use them. One of the hottest scoops in gunsmithing history is his safety breeching - a method of converting military rifles so the cartridge head is fully enclosed. His quick and easy system for barrel removal will make you kick yourself for not thinking of it on your own. The inertia bullet puller he tells you about is one of the slickest, quickest tricks you've ever seen. And these are only three of the many, many practical tips in the book. Starting with the work bench, MacFarland clearly tells you how to gunsmith from A to Z. Where to get your tools, how to get discounts, modernizing sporting rifles, converting military rifles, handguns, shotguns, chambering, carving, stock-making, trigger adjustment, how to make tools and small parts. All this and much, much more besides are in his practical book. No punches are pulled. Many gunsmiths and manufacturers will go into a fast burn at some of the comments - but that's the way MacFarland sees things. He gives an honestly critical opinion whenever he thinks it will help the professional or the kitchen gunsmith. MacFarland's not selling anything but facts. The kitchen or cellar gunsmith, the part-time semi-pro and the professional will all find practical, useful, time- and money-saving information in 'Gunsmithing Simplified'.
