Environmental Risk Assessment: Quantitative Measures, Anthropogenic Influences, Human Impact

Ian Lerche, Walter Glaesser

This book explores environmental and human risk problems caused by contamination, from the perspective of real world applications with quantitative procedures. It includes risk methods for environmental problems where data are sparse or fuzzy, and incorporates political, social and economic considerations in determining directions of remediation solutions for environmental contaminant problems. It highlights the impact of contaminants on human health – sometimes fatal - and the anthropogenic exacerbation of natural processes.
