Women and Science: Social Impact and Interaction (Science and Society Series) Suzanne Sheffield

For generations, aspiring women scientists have looked to Marie Curie, the famed Nobel Prize–winning chemist, for inspiration. But what lesson, exactly, are they to draw from her example? Marie Curie was exceptional, but she was ordinary as well. She faced all the trials and tribulations shared by women of her time; furthermore, she had to contend with the barriers against women’s wider participation in educational institutions, in scientific practice, and professional attainments and rewards. Indeed, her struggles and failures tell us more about the fate of women in the sciences, historically, than her achievements ever will.

From Maria Winkelman’s discovery of the comet of 1702 to the Nobel Prize–winning work of twentieth-century scientist Barbara McClintock, women have played a central role in modern science. Their successes have not come easily, nor have they been consistently recognized. This important book examines the challenges and barriers women scientists have faced and chronicles their achievements as they struggled to attain recognition for their work in the male-dominated world of modern science. As the only comprehensive textbook to examine women’s participation in, and portrayal by, Western science from the scientific revolution to the present, *Women and Science* is an essential teaching and reference tool for students in both the history of science and women’s studies.

Pat Tran:

As we know that book is important thing to add our information for everything. By a publication we can know everything we really wish for. A book is a list of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This guide Women and Science: Social Impact and Interaction (Science and Society Series) was filled with regards to science. Spend your spare time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading any book. If you know how big selling point of a book, you can experience enjoy to read a e-book. In the modern era like now, many ways to get book that you wanted.

Rosalie Castillo:

As a pupil exactly feel bored in order to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just little students that has reading's internal or real their passion. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Women and Science: Social Impact and Interaction (Science and Society Series) can make you feel more interested to read.
